Re:

Honorable Mayor Fewell and Board Members,

I am requesting approval for Pat Byerley and Melissa Farmer to attend the NISC Annual Conference in Denver, CO from September 17th- September 20th, 2023. They will be attending from opening night till closing.

This will be an opportunity to network with other municipal utility peers using this software and problem-solve with them, attend additional training sessions, and meet industry vendors.

The cost to attend will include the registration, accommodations, per diem, flights, and will not exceed \$2,500 per person.

This is an invaluable opportunity to gain specific industry knowledge, and I am confident you will see this as a worthwhile investment.

Sincerely,

Scott Yost
Electric Utility Manager

NISC Conference 2023

Attending: Melissa Farmer, Pat Byerley

When: September 17th- September 20th 2023

Where: Denver, Colorado

Details	Cost	Total
2 Hotel Rooms x 3 Nights	\$269/night	\$1614
Per Diem x 4 Days	\$45/day	\$360
Registration x 2	\$1095	\$2190
Flights x 2	\$149 + \$104	\$506

The conference gives an opportunity to sit in on sessions about modules we are looking towards in the future to see if they will be an ideal fit for our community before purchasing. It also gives the opportunity to network with industry vendors who will aid us in the integration it requires to reach those goals.

OMS Overview

Ability to respond quickly and efficiently to outage situations, predict outages and create detailed outage history records. Software support for two-way communication with commercial and residential customers.

Better grasp of real system performance, and ability to solve our biggest electric distribution problems.

Visual representation of outages plotted on a map to help crews quickly identify outage causes.
