Re: Design PSA with American Structurepoint, Inc. – Davis Road Regional Pump Station

Mayor and Board Members,

In April 2022, we engaged American Structurepoint to prepare a Preliminary Engineering Report in SRF format for the Waterview lift station and a proposed Davis Road lift station. We are now ready to proceed with the full design on the Davis Road Regional Pump Station and the initial phase of a Davis Road interceptor. This initial phase of this project includes a regional pump station located near the entrance to the WWTP capable of pumping up to 2500 GPM, a gravity sewer extending east to the proposed round-a-bout at Morristown Pike and Davis Road, the ability to extend a future gravity sewer west along Davis Road, and a gravity sewer extending south of Davis Road to intercept the flows entering the Chapman Estates Lift Station and abandon the existing lift station and force main.

At this time, I am requesting that the Board approve the Professional Services Agreement with American Structurepoint, Inc. in the amount of \$194,250.00 for design services related to the Davis Road Regional Pump Station Project. A copy of the PSA has been included for your review. Please let me know if there are any questions or if any other information is needed at this time.

Best Regards,
