Re: Greenfield Wastewater Utility – Septage Receiving Station Software

Mayor and Board Members,

The septage receiving station that was included in the new WWTP did not include the Franklin-Miller Hauler Logic software. The intent was to use the SCADA system to obtain the information from the system for billing and tracking purposes. However, we will need to add this software to the system in order for it to fit our needs. The software will allow us to set up customer accounts and track data points for each load of septage that is hauled and disposed of at the WWTP. BL Anderson is the local sales representative for this equipment and provided the attached quote. The total cost of the software package is $16,600.00. The server and workstation computers will need to be provided by the Wastewater Utility and IT Department.

At this time, I am requesting that the Board approve the quote from BL Anderson for the Franklin-Miller Hauler Logic software for a total cost of $16,600.00. Please let me know if there are any questions or if any other information is needed at this time.

Best Regards,

Nicholas Dezelan, CHMM, ASP
Wastewater Utility Manager

Cc: Gregg Morelock – City Attorney
         Jane Webb – Utility Coordinator
