Re: Trojan UV 3000+ Surplus Parts

Mayor and Board Members,

We currently have spare parts in inventory for our UV system that failed in 2019. I would like to designate these parts as surplus and advertise them for sale. With the construction of the new WWTP, we will be installing a new UV disinfection system, but these parts will not be compatible with the newer technology.

At this time, I am requesting permission to advertise these parts for sale. The bids would be due back prior to the next meeting of the Board of Works and Public Safety on November 24, 2020. A copy of the advertisement and a list of the available parts has been included with this request for your review. Please let me know if there are any questions regarding this request or if any other information is needed at this time.

Best Regards,
